A self-motivated, creative and ambitious developer with 4 years of Experience. I Would like to work hard and implement my abilities as well as polish my knowledge through techniques in a challenging company.

## WORK EXPERIENCE

### Frontend Developer Hailu Tech

08/2021 - Present

Lahore

#### Achievements/Tasks

- Developed Accountect, a cloud-based accounting platform using Angular 8 and Angular 10, focusing on real-time collaboration and automated financial management.
- Create well-structured, efficient, and maintainable web applications using Angular, HTML, and CSS.
- Implemented both template-driven and reactive forms in Angular for seamless data input, validation, and user interaction, ensuring robust data management capabilities using shared modules and services for consistent functionality and code reuse.
- Implement and manage application routing using Angular's built-in routing capabilities.
- Utilized Angular services and shared modules to modularize and optimize the codebase, ensuring reusability and maintainability across different parts of the application.

### UI Developer Brainplow

08/2019 - 08/2021

Faisalabad

#### Achievements/Tasks

- Created more than 8 web application pages with HTML5, CSS3 and Scss.
- Used CSS/Bootstrap to design multiple responsive web apps.
- Working on issue fixing and improving Application Performance.
- Iterated user experience to increase visitor form completion by 100%.
- Experience of Managing Angular websites.
- Knowledge of Git.

## PROJECTS

### Accountect

- I developed Accountect, a cloud-based accounting platform, to enable real-time collaboration and automated financial management. It offers features like invoicing, billing, and inventory tracking to streamline business processes.

### SellnRoar

- SELLnROAR is the Auction Universe. Fast, Easy, Cool. SELLnROAR brings the Online Auction Experience to you on it's marketplace like NEVER BEFORE! With its proprietary Machine Learning (ML) engine, SELLnROAR provides a next generation Artificially Intelligent Marketplace to connect Sellers with Buyers.

### Shezlong

- I designed the entire Shezlong website, focusing on creating a user-friendly interface for an online mental health platform. My design ensures easy navigation and accessibility, providing a confidential and welcoming environment for users to connect with professional therapists via video calls.

### BuyNRoar

- BUYNROAR is a next generation artificially intelligent comparative Online Shopping Engine where consumers can search for and compare millions of Products for the ultimate comparative shopping experience.
